

NAVY MEDICAL MODELING AND SIMULATION TRAINING

NMMAST

Our dedicated team of Subject Matter Experts provides the NMMAST program centralization and standardization of simulation center operations, training, and acquisition of equipment used to support research and naval medical assets in 31 locations worldwide. The NMMAST services that our team is providing are focused on education, training, and Graduate Medical Education efforts based on NMMAST mission requirements and directives needed to enable the Navy MMMAST to meet their mission-critical objectives.

ECS provides technical support to design, develop, and deliver medical simulation training curriculum materials in multiple delivery modalities at Military Treatment Facilities and training sites within the continental United States. In addition, ECS guide the enhancement of the medical simulation curriculum to strengthen mission-critical training for service members.

ECS will continue to provide subject matter expertise, cutting-edge information, and innovative medical simulation training tools by delivering strategic counsel to the Navy Surgeon General and Naval Medical Forces Support Command. ECS is proud to continue working with the Navy to enhance its NMMAST program to meet and possibly exceed mission-critical objectives while potentially saving more lives.

Key Features:

- Program Management and Oversight
- Curriculum Execution and Oversight
- Organizational Assessment
- Simulation Program Management
- Technical Support
- Operational Training Delivery
- Course Development and Delivery
- High Fidelity 3D Immersive Simulation Environment
- Moulage Support
